

Dear Sirs,

I am extremely dismayed that you are considering turning over the digital spectrum to Hollywood and the technology companies involved with them.

My understanding is you will, de facto, give them the right to eliminate ANY equipment or device the Hollywood elite do not want.

The past has proven the Hollywood elite, and many in the tech industry, wrong on numerous occasions.

Radio, VHS/Beta VCR's, Television are only a few.

Please do everything in your power to defeat this insanity. The technology industry generates approx. 20 times more money per annum than the film industry. Factor that into your deliberations.

Sincerely,

David B. Castle
